Price: \$1.50

SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

- .. data not available.
 - ... data not published because the number of farms in the sample for the class was less than ten, or the number of farms in the sample reporting for the item was less than three.
 - nil or zero.
 - less than 500.
-

ROUNDING

Throughout the tables in this publication, the rounding of aggregate values to thousands may cause the sum of data for detail items to differ slightly from the stated total of these items.

INTRODUCTION

The data in this report were compiled from the 1958 Survey of Farm Expenditures and Income. In general, it provides the aggregates and the number of farms reporting for the numbers, values, operation, and operating expenses for farm machinery and equipment, along with other selected items which are relevant for analysis and interpretation of the use and operation of machinery on farms. These data are estimates derived from the information collected by the interview method from the sample of farms covered by the survey.

The tabular material is presented in two levels of classification. In the first group of tables (Tables 1 to 21), the data relate to all farms (or holdings) and consist of totals for each province, the Maritime Provinces, the Prairie Provinces and Canada. They contain detailed items for the numbers, values, operation and operating expenses for motor vehicles and power machinery, and details of the numbers, values and cost of repairs for other farm machinery and equipment. The coefficient of variation associated with the estimated aggregate for the summary items is provided in these tables. In the second group of tables (Tables 24 to 29-12), the data relate to those farms (or holdings) designated as "single-farm single-family farms" in the primary classification of land holdings. The farms in this primary group are classified within each province, the Maritime Provinces, the Prairie Provinces and Canada according to area of improved land, product type of farm, and cash receipts from sales of products and services produced by the farm. Within these classifications, the tables contain data for summary items of numbers, values and operating expenses for farm machinery and equipment. In addition, other selected items are provided to reveal certain farm characteristics which pertain to the use and operation of machinery and equipment.

In using the data contained in this report, it is essential to appreciate the significance of the minimum requirements for size of holding (one acre) and value of production (250 dollars) used to establish the eligibility of a holding for inclusion in the survey. Obviously, many of these holdings could not possibly provide full employment for the operator and sufficient income to support him and his family. The operator, in these cases, must obtain a large part of his income from sources other than the holding.

It is also imperative to remember that the data in this report are estimates derived from information obtained by the interview method for a small sample of farms (approximately 1.5 per cent for Canada). These estimates, therefore, are subject to both sampling and non-sampling error. Sampling error depends on the size of sample, and the frequency of occurrence and the variability of magnitude in the sample observations for a characteristic. Non-sampling error, on the other hand, originates from the inability of respondents to provide, and enumerators to obtain accurate and complete sample data by the interview survey method.

Statistical theory provides an objective basis for measuring the sampling error of an estimate. The coefficient of variation for the summary items provided in this report is a measure of the sampling error associated with the survey estimate of the aggregate. However, the non-sampling error must be assessed by less objective methods such as comparison of the survey estimate with reliable check data obtained from other sources. This procedure can produce misleading results unless the coverage and concept are similar for the survey estimate and the check data. For the comparison to be completely valid, the survey estimate and the check data must be defined in terms which relate to an identical period, area, population and item. This close similarity is difficult to obtain, and does not exist in the series of check data available for comparison with the survey estimates. Unfortunately, the total error in an estimate may be caused mainly by the non-sampling error. Techniques for reducing the non-sampling error were used extensively in collecting the sample data. Despite these precautions, non-sampling error remains as a significant deficiency in some of the survey estimates. Consequently, the estimated aggregates cannot be considered as absolutes, and reasonable caution and judgment must be used in analysing and interpreting the data in this report.

A more comprehensive assessment of the reliability and precision of the survey estimates is contained in "1958 Farm Survey Report No. 1: Expenditures, Receipts, and Farm Capital", Occasional, D3S Catalogue No. 21-506.

PRIMARY CLASSIFICATION OF LAND HOLDINGS

The primary classification of land holdings (or farms) designed for use in tabulation and analysis of the survey data is illustrated in Figure 1, and the survey estimates of the number of holdings or farms in each class are provided in Table 22. The system of classification constitutes a series of successive sub-divisions of broad classes of holdings or farms. The levels of classification and the classes in the system are defined as follows:

1. **All holdings** consist of the total land holdings that were eligible for inclusion in the survey according to the definition of a farm used for the 1956 Census of Agriculture. This definition was "a land holding on which agricultural operations were carried out and which was (1) three or more acres in size, or (2) from one to three acres in size and produced agricultural products valued at 250 dollars or more" during the survey year. The holding may consist of a single tract of land, or a number of separate tracts held under the same or different tenures and operated as a single unit.

2. At the first level of classification, **all holdings** are classified as agricultural holdings, forestry holdings, and other non-agricultural holdings.

Agricultural holdings.—Land holdings on which cash receipts from the sale of agricultural products and services exceeded both (1) cash receipts from the sale of wood and maple products, and (2) cash receipts from the sale of sand, gravel, topsoil and sod.

Forestry holdings.—Land holdings on which cash receipts from the sale of wood and maple products exceeded both (1) cash receipts from the sale of agricultural products and services, and (2) cash receipts from the sale of sand, gravel, topsoil and sod.

Other non-agricultural holdings.—Land holdings on which cash receipts from the sale of sand, gravel, topsoil and sod exceeded both (1) cash receipts from the sale of agricultural products and services, and (2) cash receipts from the sale of wood and maple products.

3. At the second level of classification, **agricultural holdings** are classified as farm holdings and agricultural services holdings.

Farm holdings.—Agricultural holdings on which cash receipts from the sale of agricultural products exceeded cash receipts from agricultural services (custom work breeding fees, sheep shearing, caponizing, dehorning, culling, etc.).

Agricultural services holdings.—Agricultural holdings on which cash receipts from agricultural services exceeded cash receipts from the sale of agricultural products.

4. At the third level of classification, **farm holdings** are classified as farms and institutional farms.

Farms.—Farm holdings not classified as institutional farms.

Institutional farms.—Farm holdings operated by penitentiaries, hospitals, religious orders (except Hutterites), colleges, universities and other educational and research organizations.

5. At the fourth level of classification, **farms** are classified as own account farms, partnership farms and managed farms.

Own account farms.—Farms operated by a person who was not associated with others as a partner or manager in the operation of the farm. The own account farm operator may be an owner or tenant, or both, of the tracts of land in the farm. He may have employed hired labor to assist him with the farm work, or depended entirely on the labor supplied by himself and his family.

Partnership farms.—Farms operated by two or more active partners who were members of separate economic families, or family spending units. An active partner was a person who participated in the daily work and decisions and the formulation of long-run plans required in operation of the farm, and received a specified share of the income from operation of the farm. Persons were members of separate economic families if they did not pool their income to pay for the living expenses. Under this definition, a father-and-son agreement does not constitute a partnership unless the father and son were members of different economic families.

Managed farms.—Farms operated by a hired manager who received a salary or wage from a person, firm, corporation, or institution. The hired manager was responsible for the daily decisions and routine plans required in operation of the farm. Farms operated by Hutterite colonies were classified as managed farms in order to avoid the exceptional conditions originating with the communal organization of the families in these groups.

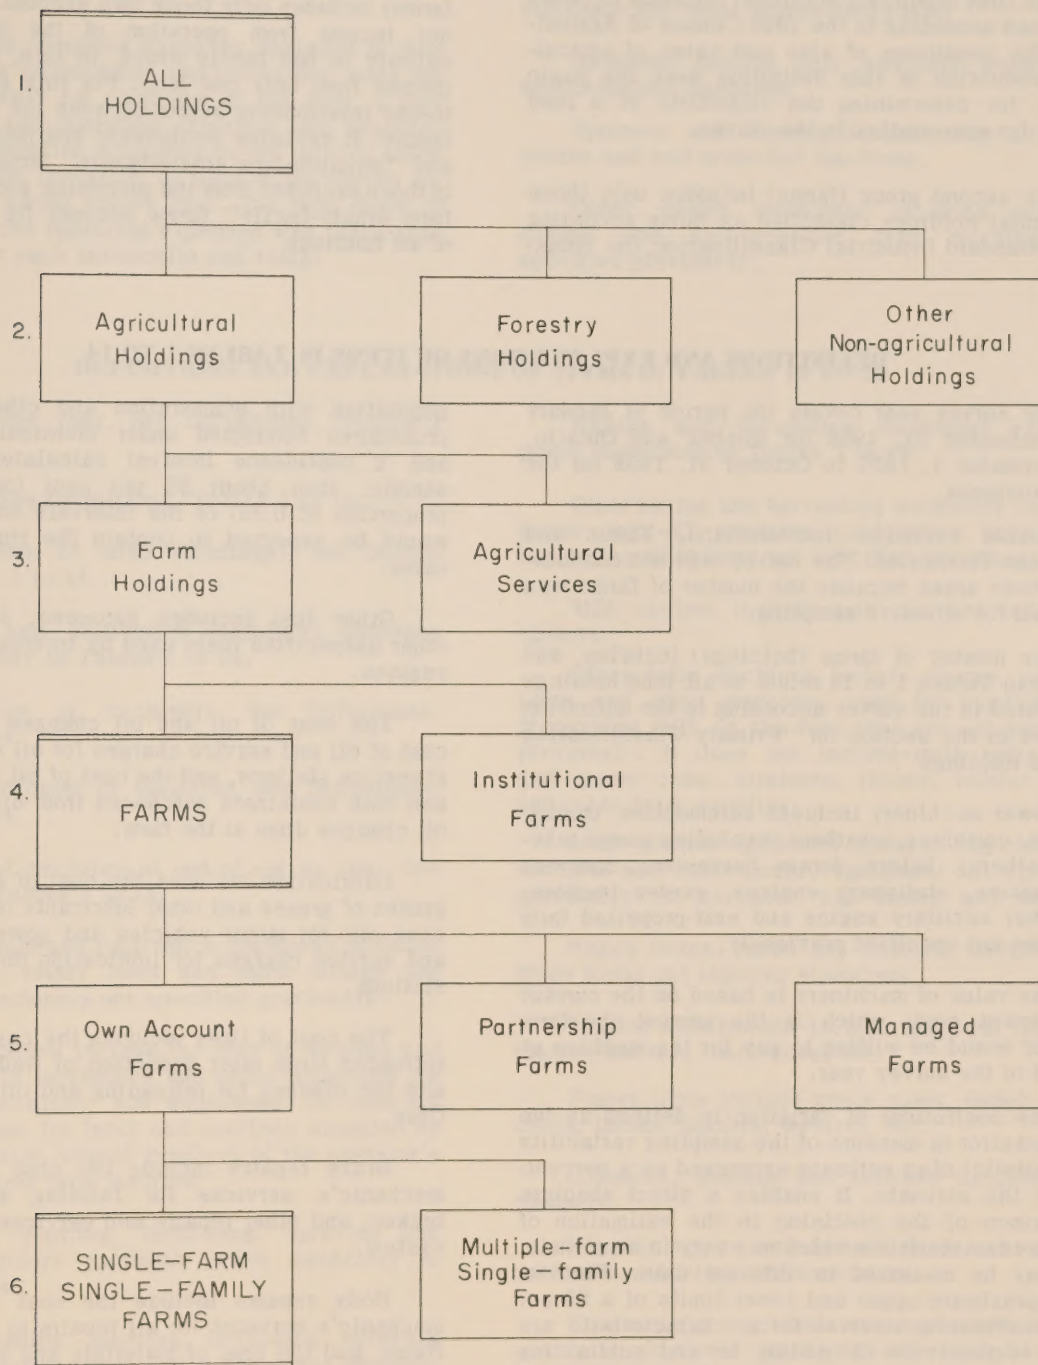

6. At the fifth level of classification, **own account farms** are classified as "single-farm single-family" farms and "multiple-farm single-family" farms.

"Single-farm single-family" farms.—Own account farms operated by a family which receives all the income from the operation of one farm and does not receive income from operating other farms. The family may receive income from sources other than operation of the farm.

"Multiple-farm single-family" farms.—Own account farms operated by a family which receives income from the operation of more than one farm. In other words, the family receives income, through participation of the operator or other member of the family as an own account operator or a partner, from the operation of two or more separate and independent farms.

FIGURE - I

PRIMARY CLASSIFICATION OF LAND HOLDINGS, FARM INCOME AND EXPENDITURE SURVEY, 1958

Tabulation and analysis of the survey data on farm operations relates to the three principal groups of farms designated as (1) all holdings, (2) farms, and (3) "single-farm single-family" farms. The position of these groups of farms within the primary classification system is shown in Figure 1.

The first group (all holdings) consists of farms as defined according to the 1956 Census of Agriculture. The conditions of size and value of agricultural production in this definition were the basic criteria for determining the eligibility of a land holding for enumeration in the survey.

The second group (farms) includes only those agricultural holdings classified as farms according to the Standard Industrial Classification, the indus-

try classification system developed and officially adopted by the Dominion Bureau of Statistics. It excludes forestry holdings, other non-agricultural holdings, agricultural services, and institutional farms. This group accounts for 97 per cent of all holdings.

The third group ("single-farm single-family" farms) includes only those own account farms where net income from operation of the farm accrues entirely to one family which, in turn, receives net income from only one farm. For this group, a one-to-one relationship exists between the farm and the family. It excludes partnership and managed farms, and "multiple-farm single-family" farms in addition to those excluded from the preceding group. "Single-farm single-family" farms account for 93 per cent of all holdings.

DEFINITIONS AND EXPLANATIONS OF ITEMS IN TABLES 1 TO 14

The survey year covers the period of January 1 to December 31, 1958 for Quebec and Ontario, and November 1, 1957 to October 31, 1958 for the other provinces.

Canada excludes Newfoundland, Yukon and Northwest Territories. The survey was not conducted in these areas because the number of farms was too small for effective sampling.

The number of farms (holdings) includes, and the data in Tables 1 to 14 relate to all land holdings enumerated in the survey according to the definition provided in the section on "Primary Classification of Land Holdings".

Power machinery includes automobiles, trucks, tractors, combines, swathers (excluding power take-off swathers), balers, forage harvesters, sprayers and dusters, stationary engines, garden tractors, and other auxiliary engine and self-propelled farm machines not specified previously.

The value of machinery is based on the current replacement cost, which is the amount the farm operator would be willing to pay for the machine at the end of the survey year.

The coefficient of variation is defined as the standard error (a measure of the sampling variability of a statistic) of an estimate expressed as a percentage of the estimate. It enables a direct absolute comparison of the precision in the estimation of various characteristics which may vary in magnitude, and may be measured in different units. Further, the approximate upper and lower limits of a 95 per cent confidence interval for a characteristic are given respectively by adding to and subtracting from the estimate twice the standard error of the estimate. Hence, if the estimated aggregate is 400 with a coefficient of variation equal to 2.5 per cent, then a 95 per cent confidence interval for the true population value is 380 to 420, i.e., $400 \pm 2 (0.025) (400)$. If repeated samples were drawn from the same

population with enumeration and other collection procedures conducted under identical conditions, and a confidence interval calculated from each sample, then about 95 per cent (or a long-run proportion of 0.95) of the intervals so established would be expected to contain the true population value.

Other fuel includes kerosene, distillate and other unspecified fuels used by internal combustion engines.

The cost of oil and oil changes includes the cost of oil and service charges for oil changes done at service stations, and the cost of oil in quart cans and bulk containers purchased from distributors for oil changes done at the farm.

Lubrication includes the cost of all types and grades of grease and other lubricants (except crank-case oil) for motor vehicles and power machinery, and service charges for lubrication done at service stations.

The cost of tires includes the cost of new and retreaded tires after deduction of trade allowance, and the charges for retreading and other repairs to tires.

Brake repairs include the cost of parts and mechanic's services for relining and adjusting brakes, and other repairs and services to the brake system.

Body repairs include the cost of parts and mechanic's services for all repairs to the body and frame, and the cost of materials and labor for body painting.

Other major repairs include the cost of parts and mechanic's services for major repairs to the motor, transmission, differential, etc., and labor charges for installation of minor repair parts.

Minor repair parts include only the cost of parts for minor repairs such as mufflers, fan belts, generators, ignition coils, distributor points, fuel pumps, headlights, shock absorbers, etc.

Other expenses include the cost of towing, emergency service calls, accessories, traffic fines and other unspecified operating expenses.

Value and operating expenses assigned to farm operation. For automobiles and trucks that were not used exclusively for operation of the farm, a part of the value and operating expenses was assigned to the farm operation according to the ratio of miles driven for farm operation to total miles driven for all purposes during survey year. The farm share of the value and the operating expenses was calculated separately for each automobile and truck.

Number of machines at end of survey year includes only those machines that were in usable condition.

Total operation during survey year includes both operation on the farm and custom work off the farm.

Other tractors include tractors that use kerosene, distillate and other unspecified fuels.

Swathers include only auxiliary engine and self-propelled machines.

Sprayers and dusters include only auxiliary engine and self-propelled machines.

Other power machinery includes auxiliary engine and self-propelled farm machines not specified previously.

DEFINITIONS AND EXPLANATIONS OF ITEMS IN TABLES 15 TO 20

The survey year. See Definitions, Tables 1 to 14.

Canada. See Definitions, Tables 1 to 14.

The number of farms (holdings). See Definitions, Tables 1 to 14.

Tillage and cultivation machinery excludes power machinery in Tables 7 to 14.

The value of machinery. See Definitions, Tables 1 to 14.

The coefficient of variation. See Definitions, Tables 1 to 14.

Number of machines at end of survey year. See Definitions, Tables 1 to 14.

Other tillage and cultivation machinery includes rod weeders, rotary hoes and other tillage and cultivation machinery not specified previously.

Labor charges include the cost of welding and the services of mechanics and other tradesmen for repairs to machinery and equipment. It does not include charges for labor and services supplied by the farm operator, unpaid members of the operator's family, and hired farm laborers.

Seeding, planting, fertilizing, spraying and dusting machinery excludes power machinery in Tables 7 to 14.

Other seeding, planting, fertilizing, spraying and dusting machinery includes broadcast seeders; vegetable planters; tobacco planters; fertilizer, spray and dust attachments; power take-off sprayers and dusters; and other seeding, planting, fertilizing, spraying and dusting machinery not specified previously.

Haying and harvesting machinery excludes power machinery in Tables 7 to 14.

Other haying and harvesting machinery includes power take-off swathers, and other haying and harvesting machinery not specified previously.

Milk coolers include both can and bulk tank coolers.

Other dairy machines include churns, pasteurizers and other machines used for handling and processing milk on the farm that are not specified previously. It does not include milk pails, milk and cream cans, strainers, filters, bottles, caps and other dairy supplies.

Other poultry equipment includes egg cleaners, candlers and other poultry equipment not specified previously. It excludes egg cases and cartons.

Wagon boxes, racks and flatbeds include only those items not reported elsewhere.

Tractor attachments include front-end loaders, blades, shovels, back-hoes, etc.

Power tools include chain saws, bench saws, drills, lathes, planers, welders, etc.

Cleaners, graders and treaters exclude barn cleaners.

Electric motors include only those not reported with other machines and equipment.

Custom-built machines and equipment include specially designed machines and equipment not reported elsewhere.

Other farm machinery and equipment includes all farm machinery and equipment not specified previously. It does not include small tools, and fencing, building and other supplies.

DEFINITIONS AND EXPLANATIONS OF ITEMS IN TABLE 21

Table 21 provides a summary of the values and operating expenses for farm machinery and equipment in Tables 1 to 20. In addition, it contains data for other items selected to reveal certain farm characteristics which are relevant for analysis and interpretation of the data on use and operation of machinery and equipment on farms.

The survey year. See Definitions, Tables 1 to 14.

Canada. See Definitions, Tables 1 to 14.

The number of farms (holdings). See Definitions, Tables 1 to 14.

The value of machinery. See Definitions, Tables 1 to 14.

Value and operating expenses (farm share). See "Value and operating expenses assigned to farm operation" under Definitions, Tables 1 to 14.

The coefficient of variation. See Definitions, Tables 1 to 14.

Value at End of Survey Year

Total machinery and equipment (farm share) consists of the values for power machinery (farm share), and other farm machinery and equipment.

Power machinery (farm share) consists of the farm share values for automobiles and trucks, and the total values for tractors, combines, swathers, balers, forage harvesters, sprayers, dusters, stationary engines, garden tractors, and other auxiliary engine and self-propelled farm machines not specified previously.

Other machinery and equipment consists of the values for tillage and cultivation machinery; seeding, planting, fertilizing, spraying and dusting machinery; haying and harvesting machinery; dairy machines; poultry equipment; and miscellaneous farm machinery and equipment.

Power machinery (total) consists of the total values for automobiles, trucks, tractors, combines, swathers, balers, forage harvesters, sprayers, dusters, stationary engines, garden tractors, and other auxiliary engine and self-propelled farm machines not specified previously.

Operating Expenses during Survey Year

Total Machinery and Equipment (Farm Share)

Total expenses, less refund of gasoline tax, consist of the operating expenses, less refund of gasoline tax, for motor vehicles and power machinery (farm share), and total expenses for repairs to other machinery and equipment.

Power machinery (farm share) consists of the farm share of operating expenses for automobiles and trucks, and total operating expenses for tractors, combines, swathers, balers, forage harvesters, sprayers, dusters, stationary engines, garden tractors, and other auxiliary engine and self-propelled farm machines not specified previously.

Total expenses, less refund of gasoline tax, consist of the costs for fuel, oil, grease and anti-freeze, less refund of gasoline tax; repairs and accessories; and license and insurance.

Fuel, oil, grease and anti-freeze include the costs for gasoline less tax refund, diesel fuel, other fuel, oil and oil changes, grease and other lubricants, and anti-freeze.

Repairs and accessories include the costs for tires, inner tubes, tire chains, batteries, spark plugs, brake repairs, body repairs, other major repairs, minor repair parts, and other expenses not specified.

License and insurance include the costs for licenses, registrations and insurance.

Other machinery and equipment consists of expenses for repairs to tillage and cultivation machinery; seeding, planting, fertilizing, spraying and dusting machinery; haying and harvesting machinery; dairy machines; poultry equipment; and miscellaneous farm machinery and equipment.

Total expenses for repairs consist of the costs for repair parts and labor charges.

Repair parts include the costs of parts purchased for repairs.

Labor charges include the costs for welding and the services of mechanics and other tradesmen for repairs. It does not include charges for labor and services supplied by the farm operator, unpaid members of the operator's family, and hired farm laborers.

Power Machinery (Total)

Total expenses, including gasoline tax, consist of the total operating expenses, including gasoline tax, for automobiles, trucks, tractors, combines, swathers, balers, forage harvesters, sprayers, dusters, stationary engines, garden tractors, and other auxiliary engine and self-propelled farm machines not specified previously.

Power Machinery (Farm Share)

Total expenses, including gasoline tax, consist of the farm share of operating expenses for automobiles and trucks, and the total operating expenses, including gasoline tax, for tractors, combines,

swathers, balers, forage harvesters, sprayers, dusters, stationary engines, garden tractors, and other auxiliary engine and self-propelled farm machines not specified previously.

Other Selected Farm Data

Improved land consists of the area of land used during the survey year for

- (1) grain crops (spring wheat, durum wheat, fall wheat, oats for grain, barley, mixed grains, fall rye, spring rye, flaxseed, buckwheat, and corn for grain);
- (2) potatoes and field roots (potatoes for sale or for home use, and turnips, swedes and mangels);
- (3) other field crops (sugar beets, dry field beans, soybeans, dry field peas, sunflowers for seed, rapeseed, mustard seed, tobacco, flax for fibre, hops, and other field crops not specified previously);
- (4) hay and forage crops (corn for ensilage or fodder, tame grasses, clovers and alfalfa cut for hay, ensilage or seed, and other fodder crops for hay, green feed or ensilage);
- (5) fruits and vegetables (tree fruits, vegetables, strawberries, raspberries, grapes, currants, and other small fruits);
- (6) nursery and greenhouse products;
- (7) improved pasture;
- (8) summerfallow;
- (9) and other improved land (barnyards, lanes, home gardens, and other improved land not specified previously).

Farm capital consists of

- (1) values for farm houses, buildings and land owned, rented from other persons, and managed for other persons by the farm operator (excluding farm houses, buildings and land owned by the operator and rented to other persons);
- (2) farm share value for power machinery;
- (3) total value for other machinery and equipment;
- (4) and value of livestock (including fur animals) and poultry on hand at end of survey year.

Farm operating expenses consist of the costs for

- (1) taxes on farm property owned by the operator (excluding farm property rented to other persons);
- (2) rent for farm property rented by the operator from other persons;
- (3) mortgage interest on farm property owned by the operator (excluding farm property rented to other persons);
- (4) interest on bank loans and other loans and credit for farm business;
- (5) purchases of feed (ground and whole grain, including exchanges; hay, silage and other roughages; prepared feeds; millfeeds; feed supplements; stock salt; and oyster shell and grit);
- (6) pasturing and feeding livestock;
- (7) other livestock and poultry services (artificial insemination; breeding fees; veterinary services; serums, tonics, vaccines and medicines; culling, castrating, caponizing, dehorning, etc.);

- (8) purchases of cattle and calves;
- (9) purchases of hogs;
- (10) purchases of sheep;
- (11) purchases of poultry and hatching eggs;
- (12) purchases of horses, bees, and other revenue producing animals (excluding fur animals);
- (13) purchases of seeds, seed inoculants, soil testing, and seed certification;
- (14) purchases of trees, vines, plants, shrubs, bulbs, and flower seeds for commercial planting and home garden;
- (15) purchases of chemical fertilizers;
- (16) purchases of agricultural lime;
- (17) purchases of stable phosphate, manure, and mulching materials;
- (18) purchases of weedicides for crops;
- (19) purchases of insecticides, fungicides, and pesticides;
- (20) custom work and machine rental (excluding land clearing, and construction and repair of farm houses and buildings, farm roads and lanes, drainage ditches, tile drains, irrigation facilities, wells, cisterns, and fences);
- (21) farm share of operating expenses for power machinery (fuel less refund of gasoline tax, oil, grease and anti-freeze; repairs, parts, accessories, and hired repair labor; and license, registration and insurance);
- (22) repair parts and hired repair labor for other machinery and equipment;
- (23) repairs to farm houses and buildings (materials, hired machinery and equipment, and hired tradesmen and unskilled laborers);
- (24) repairs to farm roads and lanes, drainage ditches, tile drains, irrigation facilities, wells, cisterns, and fences (materials, hired machinery and equipment, and hired tradesmen and unskilled laborers);
- (25) premiums paid during survey year for fire, wind and other property insurance (excluding comprehensive policies) on farm house and contents (excluding farm house rented to other persons);
- (26) premiums paid during survey year for fire, wind and other property insurance on farm buildings and contents (excluding the farm house), floater insurance on livestock, hail and other insurance on crops, workmen's compensation and other liability insurance, and comprehensive insurance policies (excluding farm buildings rented to other persons);
- (27) cash wages paid to workers hired for farm work;
- (28) value of meals and food, housing and lodging, laundry, fuel, transportation, etc. provided to workers hired for farm work;
- (29) miscellaneous farm expenses (purchases of containers, heating fuel for farm business, tools and farm supplies; farm share cost for telephone and electricity; cost of technical books and farm magazines; bookkeeping and legal fees; fees to marketing and farm organizations; livestock registration fees; and irrigation charges).

Custom work and machine rental consists of the costs for custom work hired and machines rented for breaking; plowing, disking and cultivating;

planting and seeding; baling; field chopping of forage crops; combining; threshing; silo filling; corn picking; feed grinding and mixing; trucking; swathing; snow plowing; spreading chemical fertilizers and lime; spraying and dusting; wood cutting; white-washing; and other custom work not specified previously (excluding custom work and machine rental for land clearing, and construction and repair of buildings, fences, drainage and irrigation systems, and water facilities).

Cash Receipts from Sales of Farm Products and Services

Total products and services consists of the farm cash receipts from sales of

- (1) field products (including supplementary payments);
- (2) livestock and poultry;
- (3) livestock and poultry products;
- (4) feeding and pasturing services;
- (5) forest and maple products;
- (6) custom work;
- (7) miscellaneous farm products and services (horses; furs and fur animals; honey and beeswax; vegetable plants; nursery products and cut flowers; other farm products not specified previously; breeding fees; farm services such as sheep shearing, caponizing, dehorning and culling; re-sale of unused farm supplies; and sand, gravel, top soil and sod).

Field products consists of

- (1) cash receipts from sales of field crops (wheat, oats, barley, rye, flaxseed, mixed grain, grain corn, dry beans, dry peas, oilseeds other than flaxseed, buckwheat, sugar beets, potatoes, tobacco, forage seeds, hay, turnips, mangels, and other field crops not specified previously);
- (2) cash receipts from sales of fruits (apples, peaches, pears, plums, prunes, cherries, apricots, grapes, strawberries, raspberries, and other fruits not specified previously);
- (3) cash receipts from sales of fresh and canning vegetables (tomatoes, peas, corn, carrots, onions, cabbage, lettuce, celery, beets, beans, and other vegetables not specified previously);
- (4) cash receipts from interim and final payments for wheat, oats and barley;
- (5) and cash receipts from supplementary payments (Prairie Farm Assistance Act, etc.).

Livestock and livestock products consists of

- (1) cash receipts from sales of livestock and poultry (cattle, calves, hogs, sheep, lambs, hens, chickens, turkeys, and other poultry) sold alive and slaughtered for sale;
- (2) cash receipts from sales of livestock and poultry products (whole and skim milk, cream, farm-made butter and cheese, fresh and hatching eggs, hides, and wool);
- (3) and cash receipts from feeding and pasturing services (feeding and pasturing livestock, and feeding poultry).

Custom work consists of cash receipts from work (trucking, spraying, baling, combining, etc.) done for other persons using farm machinery and equipment owned by the operator, and his own labor or labor hired by him.

Total products and services, adjusted for inventory change, consists of

- (1) farm cash receipts from sales of products and services produced by the farm, supplementary payments, custom work, and re-sale of unused farm supplies;
- (2) and value of change in inventory of crops and livestock (grains; oilseeds; dry beans; dry peas; sugar beets; potatoes; tobacco; forage seeds; hay, turnips and mangels; hops; other field crops not specified previously; forest and maple products; cattle and calves; hogs; sheep and lambs; poultry; horses; other revenue producing animals; and furs and fur animals).

Farm gross income consists of

- (1) farm cash receipts from sale of products and services produced by the farm, supplementary payments, custom work, and re-sale of unused farm supplies;
- (2) value of change in inventory of crops and livestock;
- (3) value of income in kind (cattle and calves, hogs, sheep and lambs, and poultry slaughtered for home use; milk, cream, butter, cheese, eggs, fruits and vegetables, potatoes, maple products, honey, and grains for home use; and fuelwood, fence posts, and logs for lumber used on the farm);
- (4) and income imputed to annual rental value of the farm house.

DEFINITIONS AND EXPLANATIONS OF ITEMS IN TABLES 22, AND 23-01 TO 23-12

Classification of Farms (Holdings)

All land holdings, excluding institutional farms, are classified according to the primary classification of land holdings designed for use in tabulation and analysis of the survey data. Definitions of the classes can be found in the section on "Primary Classification of Land Holdings". Classes containing less than ten farms in the sample are omitted from Tables 23-01 to 23-12.

Definitions and Explanations of Items

The number of farms (holdings) is the survey estimate of the total land holdings in the specified primary classes. For definitions and explanations of other items, see Definitions, Table 21.

DEFINITIONS AND EXPLANATIONS OF ITEMS IN TABLES 24, AND 25-01 TO 25-12

Classification of Farms

All "single-farm single-family farms", as defined in the primary classification of land holdings, are classified according to the area of improved land owned by the farm operator and rented from other persons by the operator. Land owned by the operator and rented to other persons is excluded. Some classes in Table 24 are combined to contain ten or more farms in the sample in Tables 25-01 to 25-12.

Improved land consists of the area of land used during the survey year for

- (1) grain crops (spring wheat, durum wheat, oats for grain, barley, mixed grains, fall rye, spring rye, flaxseed, buckwheat, and corn for grain);
- (2) potatoes and field roots (potatoes for sale or home use, and turnips, swedes and mangels);
- (3) other field crops (sugar beets, dry field beans, soybeans, dry field peas, sunflowers for seed, rapeseed, mustard seed, tobacco, flax for fibre, hops, and other field crops not specified previously);

- (4) hay and forage crops (corn for ensilage or fodder, tame grasses, clovers and alfalfa cut for hay, ensilage or seed, and other fodder crops cut for hay, green feed or ensilage);
- (5) fruits and vegetables (tree fruits, vegetables, strawberries, raspberries, grapes, currants, and other small fruits);
- (6) nursery and greenhouse products;
- (7) improved pasture;
- (8) summerfallow;
- (9) and other improved land (barnyards, lanes, home gardens, and other improved land not specified previously).

Definitions and Explanations of Items

The number of farms is the survey estimate of "single-farm single-family farms" in the specified classes of improved land area. For definitions and explanations of other items, see Definitions, Table 21.

DEFINITIONS AND EXPLANATIONS OF ITEMS IN TABLES 26, AND 27-01 TO 27-12

Classification of Farms

All "single-farm single-family farms", as defined in the primary classification of land holdings, are classified according to product type of farm. The product type of farm class is determined by the percentage of cash receipts from sales of all farm products and services that was obtained from specified products and services produced by the farm. Classes containing less than ten farms in the sample are omitted from Tables 27-01 to 27-12.

Cash receipts from sales of farm products and services consists of the farm cash receipts from sales of

- (1) field products (including supplementary payments);
- (2) livestock and poultry;
- (3) livestock and poultry products;
- (4) feeding and pasturing services;
- (5) forest and maple products;
- (6) custom work;
- (7) and miscellaneous farm products and services (horses; furs and fur animals; honey and beeswax; vegetable plants; nursery products and cut flowers; other farm products not specified previously; breeding fees; farm services such as sheep shearing, caponizing, dehorning and culling; re-sale of unused farm supplies; and sand, gravel, top soil, and sod).

- (2) dairy (milk, cream, and dairy combination);
- (3) poultry (eggs, poultry meat, poultry feeding, and poultry combination);
- (4) and livestock and poultry combination.

Cattle, hogs and sheep consists of the following product types of farms;

- (1) cattle—cash receipts from cattle and calves sold alive and slaughtered for sale, and from sales of hides equals 51 per cent or more of cash receipts from sales of farm products and services;
- (2) hogs—cash receipts from hogs sold alive and slaughtered for sale equals 51 per cent or more of cash receipts from sales of farm products and services;
- (3) sheep—cash receipts from sheep and lambs sold alive and slaughtered for sale, and from sales of wool equals 51 per cent or more of cash receipts from sales of farm products and services;
- (4) livestock feeding and pasturing—cash receipts from feeding and pasturing livestock owned by other persons equals 51 per cent or more of cash receipts from sales of farm products and services;
- (5) livestock combination (excluding farms classified as cattle; hogs; sheep; and livestock feeding and pasturing)—cash receipts from sales of livestock (cattle, calves, hogs, sheep and lambs sold alive and slaughtered for sale), hides, wool, and livestock feeding and pasturing services equals 51 per cent or more of cash receipts from sales of farm products and services.

Product Type of Farm

Livestock and poultry consists of the following product types of farms;

- (1) cattle, hogs and sheep (cattle, hogs, sheep, livestock feeding and pasturing, and livestock combination);

Dairy consists of the following product types of farms;

- (1) milk—cash receipts from sales of whole and skim milk equals 51 per cent or more of cash receipts from sales of farm products and services;

- (2) cream—cash receipts from sales of cream equals 51 per cent or more of cash receipts from sales of farm products and services;
- (3) dairy combination (excluding farms classified as milk, and cream)—cash receipts from sales of dairy products (whole and skim milk, cream, and farm-made butter and cheese) equals 51 per cent or more of cash receipts from sales of farm products and services.

Poultry consists of the following product types of farms;

- (1) eggs—cash receipts from sales of fresh and hatching eggs equals 51 per cent or more of cash receipts from sales of farm products and services;
- (2) poultry meat—cash receipts from hens and chickens, turkeys, and other poultry sold alive and slaughtered for sale equals 51 per cent or more of cash receipts from sales of farm products and services;
- (3) poultry feeding—cash receipts from feeding poultry owned by other persons equals 51 per cent or more of cash receipts from sales of farm products and services;
- (4) poultry combination (excluding farms classified as eggs; poultry meat; and poultry feeding)—cash receipts from sales of fresh and hatching eggs, poultry meat (hens and chickens, turkeys, and other poultry sold alive and slaughtered for sale), and poultry feeding services equals 51 per cent or more of cash receipts from sales of farm products and services.

Livestock and poultry combination (excluding farms classified as cattle; hogs; sheep; livestock feeding and pasturing; livestock combination; milk; cream; dairy combination; eggs; poultry meat; poultry feeding; and poultry combination)—cash receipts from sales of livestock (cattle, calves, hogs, sheep and lambs sold alive and slaughtered for sale), hides, wool, livestock feeding and pasturing services, dairy products (whole and skim milk, cream, and farm-made butter and cheese), fresh and hatching eggs, poultry meat (hens and chickens, turkeys, and other poultry sold alive and slaughtered for sale), and poultry feeding services equals 51 per cent or more of cash receipts from sales of farm products and services.

Field crops consists of the following product types of farms;

- (1) wheat;
- (2) cash grains;
- (3) special field crops (potatoes, tobacco, and other special field crops);
- (4) and field crops combination.

Wheat—cash receipts from sales (including interim and final participation payments) of wheat equals 51 per cent or more of cash receipts from sales of farm products and services.

Cash grains (excluding farms classified as wheat)—cash receipts from sales (including interim and final participation payments for wheat,

oats and barley) of wheat, oats, barley, rye, flaxseed, mixed grain, grain corn, dry beans, dry peas, soybeans, rapeseed, mustard seed, sunflower seed, buckwheat, and supplementary payments (Prairie Farm Assistance Act, etc.) equals 51 per cent or more of cash receipts from sales of farm products and services.

Special field crops consists of the following product types of farms;

- (1) potatoes—cash receipts from sales of potatoes equals 51 per cent or more of cash receipts from sales of farm products and services;
- (2) tobacco—cash receipts from sales of tobacco equals 51 per cent or more of cash receipts from sales of farm products and services;
- (3) other special field crops (excluding farms classified as potatoes and tobacco)—cash receipts from sales of sugar beets, potatoes, tobacco, forage seeds (alfalfa, red clover, alsike, sweet clover, timothy, and brome grass), hay, turnips, mangels, hops, and other field crops not specified previously equals 51 per cent or more of cash receipts from sales of farm products and services.

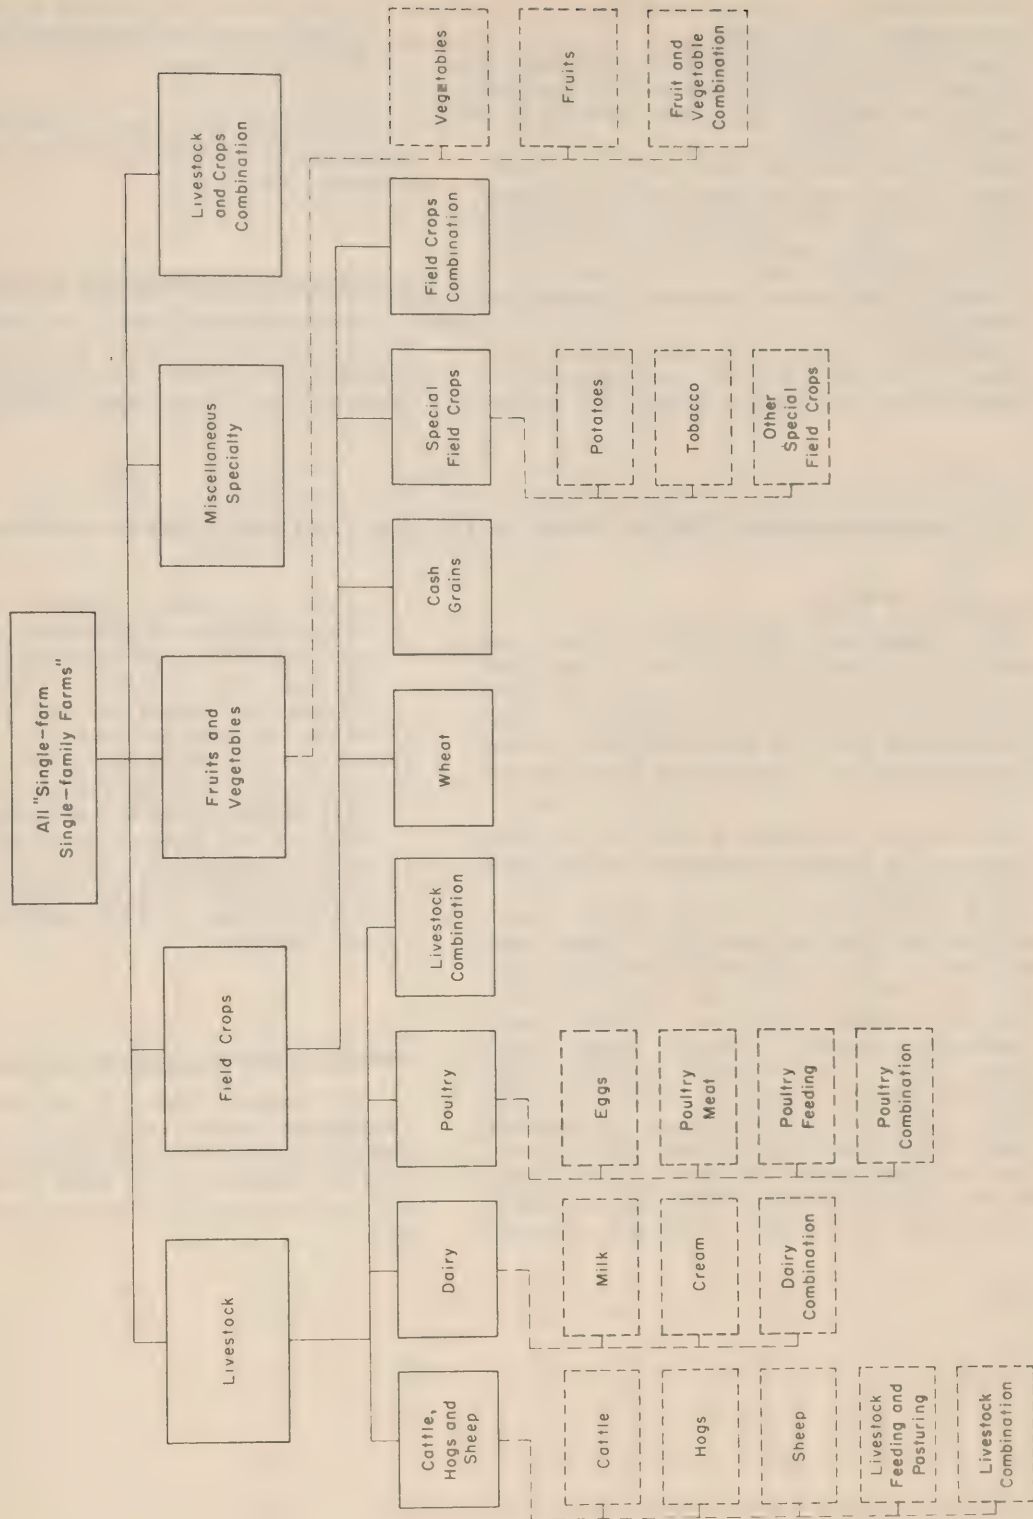

Field crops combination (excluding farms classified as wheat; cash grains; potatoes; tobacco; and other special field crops)—cash receipts from sales (including interim and final participation payments for wheat, oats and barley) of wheat, oats, barley, rye, flaxseed, mixed grain, grain corn, dry beans, dry peas, soybeans, rapeseed, mustard seed, sunflower seed, buckwheat, supplementary payments (Prairie Farm Assistance Act, etc.), sugar beets, potatoes, tobacco, forage seeds (alfalfa, red clover, alsike, sweet clover, timothy, and brome grass), hay, turnips, mangels, hops, and other field crops not specified previously equals 51 per cent or more of cash receipts from sales of farm products and services.

Fruits and vegetables consists of the following product types of farms;

- (1) vegetables—cash receipts from sales of fresh and canning vegetables (tomatoes, peas, corn, carrots, onions, cabbage, lettuce, celery, beets, beans, and other vegetables not specified previously) equals 51 per cent or more of cash receipts from sales of farm products and services;
- (2) fruits—cash receipts from sales of fruits (apples, peaches, pears, plums, cherries, apricots, grapes, strawberries, raspberries, and other fruits not specified previously) equals 51 per cent or more of cash receipts from sales of farm products and services;
- (3) fruits and vegetables combination (excluding farms classified as fruits, and vegetables)—cash receipts from sales of fresh and canning vegetables (tomatoes, peas, corn, carrots, onions, cabbage, lettuce, celery, beets, beans, and other vegetables not specified previously), and fruits (apples, peaches, pears, plums, prunes, cherries, apricots, grapes, strawberries, raspberries, and other fruits not specified previously) equals 51 per cent or more of cash receipts from sales of farm products and services.

FIGURE -2

CLASSIFICATION OF PRODUCT TYPES OF FARMS, FARM INCOME AND EXPENDITURE SURVEY, 1958

Miscellaneous specialty consists of the following product types of farms;

- (1) fur and fur animals—cash receipts from sales of furs and fur bearing animals equals 51 per cent or more of cash receipts from sales of farm products and services;
- (2) horses—cash receipts from sales of horses equals 51 per cent or more of cash receipts from sales of farm products and services;
- (3) bees and honey—cash receipts from sales of honey and beeswax equals 51 per cent or more of cash receipts from sales of farm products and services;
- (4) greenhouses and nurseries—cash receipts from sales of vegetable plants, flower plants, cut flowers, bulbs, and nursery stock (trees, shrubs,

vines, canes, etc.) equals 51 per cent or more of cash receipts from sales of farm products and services.

Livestock and crops combination consists of all farms not classified in the product types of farms specified previously.

Definitions and Explanations of Items

The number of farms is the survey estimate of "single-farm single-family farms" in the specified product types of farms. For definitions and explanations of other items, see Definitions, Table 21.

DEFINITIONS AND EXPLANATIONS OF ITEMS IN TABLES 28, AND 29-01 TO 29-12

Classification of Farms

All "single-farm single-family farms", as defined in the primary classification of land holdings, are classified according to cash receipts from sales of products and services produced by the farm. Some classes in Table 28 are combined to contain ten or more farms in the sample in Tables 29-01 to 29-12.

Cash receipts from sales of products and services produced by the farm consists of the farm cash receipts from sales of

- (1) field products (wheat, oats, and barley; interim and final participation payments for wheat, oats, and barley; rye, flaxseed, mixed grain, and grain corn; dry beans and dry peas; soybeans, rapeseed, mustard seed, and sunflower seed; buckwheat; potatoes; tobacco; sugar beets; forage seeds; hay; turnips; mangels; hops; fresh and canning vegetables; fruits; and other field products not specified previously);
- (2) livestock and livestock products (cattle, calves, hogs, sheep and lambs sold alive and slaughtered for sale; hides and wool; whole and skim milk, cream, and farm-made butter and cheese);

- (3) poultry and poultry products (hens, chickens, turkeys and other poultry sold alive and slaughtered for sale; and fresh and hatching eggs); feeding and pasturing services (livestock feeding and pasturing, and poultry feeding);
- (4) forest and maple products;
- (5) and miscellaneous farm products and services (horses; furs and fur animals; honey and beeswax; vegetable and flower plants; nursery products and cut flowers; other farm products not specified previously; breeding fees; other farm services such as sheep shearing, caponizing, dehorning, and culling; and sand, gravel, top soil, and sod).

Definitions and Explanations of Items

The number of farms is the survey estimate of "single-farm single-family farms" in the specified classes of cash income from sales of products and services produced by the farm. For definitions and explanations of other items, see Definitions, Table 21.
